Further Information	<p>In designing, the combination of imagination, trained vision and understanding of space are a decisive advantage. While studying, drawing is a process of intensive learning of the human body in 3D. As such, drawing represents training in precisely the aforementioned critical components for an outstanding design.</p> <p>Educational goals are: applying the knowledge and skills acquired in basic studies to a different task; developing an understanding of image and colour composition; training the confident handling of drawing materials and techniques. The drawing skills gained in the project form the framework for a completely free, individual artistic expression.</p>
